Session Description

...United we stand, divided we fall! Following along the Joint Meeting theme “Discovery and Scientific Progress Together,” this session is home for a wide range of contributions in oral and poster format on topics in Solid Earth geophysics. Contributions may address the origin, evolution and structure of the solid earth, its components and its solar system context, ranging in scale from microscopic to planetary! We welcome original communications that focus on new field or laboratory observations, applied methods, case studies, theory and modelling studies, as well as reviews drawn from all areas of solid earth geophysics.

Primary Affiliation: CGU, Solid Earth

Joint Session Submission: none
