³University of Saskatchewan, Department of Soil Science, Saskatoon, SK, E-mail: tom.yates@usask.ca

Session Description

The objective of this session is to share experiences and effective strategies for raising awareness around the importance of soil and the geosciences in outreach and classroom settings. This session focuses on current trends and activities in postsecondary education at Canadian universities and outreach. In the face of global change and increasing demand of natural resources, communicating the value of soil and geoscience in general has never been more important. We invite you to share and discuss your approaches for getting society to appreciate the importance of what lies beneath our feet and in the field of geoscience.
